

Kevin Hutson Demo

Last month we had Kevin Hutson, from Brighton, demonstrating how to turn 'square edged bowls and platters. Kevin has been on the circuit for around 30 years so was able to give us a good insight into marketing of wares for those so inclined.

His work is in at least 25 galleries all around the country and because of this he was unable to bring examples of his work. Apparently it is all out there somewhere in the big wide world.

I have, therefore, with his permission, taken shots from his website so you can get an idea of the scope covered.

Unusual device brought in by John Chapman

Did you spot this on the table last month? ...and more to the point, do you know what it is? If not, you are in good company as nobody else did either!!

John took it to The Wood Fair to ask 'TATHS'. Hopefully he will return this month with the answer

Update on Proposed Audio/Visual System

System using dedicated CCTV cameras

Audio System sorted. We will be using 'inhouse' equipment with our own clip mike. Visual System getting nearer. Wifi dismissed owing to technical limitations. We now have to decide between dedicated CCTV cameras and camcorders. Former requires all the equipment as per left but offers high quality image. We would not be able to add existing small monitor for demonstrator.

Camcorders go straight into splitter as does small monitor but comparative quality of image not known at present.

Bill is tearing his hair out with frustration at our indecision, it is such small pleasures in life that keeps me going.
